

Clinch River Chapter 662 Strategic Plan FY 2023-2027

The mission of the Clinch River Chapter of Trout Unlimited is to conserve and protect the Clinch River trout fishery and its watershed below Norris Dam through education, communication, restoration and conservation.

The chapter's goal is to be an active organization that promotes conservation by protecting and enhancing the ecosystem of the Clinch River and its watershed. To meet this goal, our leadership will continue to seek ways to improve our strengths and weaknesses and will provide diverse opportunities in order to accomplish CRCTU's mission.

To improve the chapter's sustainability, it is important to grow the active membership base and develop future leaders. To do this, the chapter will develop events and programs to attract new members.

The chapter's annual work plan provides details of how the chapter will accomplish its mission and realize its goals.

Bob Stephan
CRCTU President
Norris, TN
